

Windham Regional Commission Energy Training Event
May 3rd from 6 to 8pm
Dover Town Hall

Hello all,

The Windham Regional Commission will be hosting a second municipal enhanced energy training event on **Wednesday, May 3rd from 6:00-8:00 p.m. in the Dover Town Hall, 189 Taft Brook Rd (NOT to be confused with the Town Office location in West Dover)**. The event will include an overview of Act 174, a discussion of enhanced energy planning for municipalities (what the element enhancement includes), and discussion on town level energy data. We invite all municipalities interested in learning more about or participating in town comprehensive energy planning to join us for these discussions. Please RSVP if you plan on attending and forward to all interested parties.

On a related but separate note, the Windham Regional Commission would like to remind the towns that by the end of April, each town will receive a package of data relating to their energy consumption. The package includes data on current use, projected use, target numbers for renewable energy generation, town maps indicating where there is potential for generation based off on state-wide constraints, and a written template for the enhanced energy element which is compliant with the Act 174 standards towns can choose to use.

I look forward to seeing you in May.

Best,

Marion Major

Energy Planner
